**YOU DON'T HAVE TO BE A
POWER-USER TO CREATE
SOPHISTICATED FORMS!**

**Why rely on power-users?
Get the freedom to create
powerful forms in minutes!**

What options do you have?

Most of the existing forms solutions for SharePoint (such as InfoPath) are proprietary form tools, external to SharePoint, **designed for technical power-users**. Usually an organization that uses such tools, needs to employ a dedicated “forms expert” team that creates forms for the entire company, which significantly increases the cost of creating and maintaining such forms. Moreover, all SharePoint’s extensibility features will not work inside these custom forms, because these are proprietary forms and not SharePoint forms.

Forms for Everyone: Introducing KWizCom Forms

KWizCom Forms app is a 100% SharePoint-Native forms solution for SharePoint online (Office 365), designed for non-technical end-users.

Join the **FAST TRACK** to **PRODUCTIVITY**

So, what makes KWizCom Forms app different?

KWizCom Forms app is designed for non-technical users.

End-users can easily create sophisticated, rich forms in minutes, thus removing the need for skilled, more expensive technical power-users.

KWizCom Forms app is 100% SharePoint-native.

Instead of introducing another proprietary forms designer, we turn your existing list forms into rich, enhanced web & mobile forms!

Why is that good? Because all other SharePoint features will keep working inside your KWizCom Forms, and because there's no need to deploy and teach end-users any new Forms technology!

How do you benefit from this?

Quick & Easy Deployment

Customers get the same familiar SharePoint list forms, so they don't have to learn new technology and a new UI.

Anyone can create forms and a lot faster!

No more need for "form experts" bottlenecks!

Now business users can create their required forms by simply adding the required form logic to existing SharePoint lists.

Keep Your SharePoint Freedom!

Since KWizCom Forms is a SharePoint-hosted app, it seamlessly blends into the SharePoint infrastructure, allowing clients to keep benefiting from SharePoint as a flexible, extendable framework. So if it works with SharePoint, it will also work with KWizCom Forms!

Join the **FAST TRACK** to **PRODUCTIVITY**

So, Why KWizCom Forms App?

- Does not require any technical skills
- Powerful web & mobile forms created much faster, by anyone!
- 100% SharePoint-Native, no additional external tools to deploy and maintain
- **Radically reduces the cost of ownership!**
