Version 1.0.19, Feb-07-2018	
4543	Added: Integrate with Forms app.
5247	Fixed: Render all lookups, multi lookups and user fields using select2 control which allows type-in for filter when you got more than 6 options.

CR#	Description
Version 1.0.18, Dec-31-2017	
5511	Fixed: Disabling a repeating rows field that uses the sum/count totaling will return an error message at the top.
5537	Fixed: Sometimes editing repeating rows data causes an error to appear.
Version 1.0.16, Nov-27-2017	
4757	Added: Allow the ability to customize column widths in repeating rows app
5508	Added: Add options when creating a new column: Add to all content types, Add to default view.
Version 1.0.14, Aug-28-2017	
5336	Fixed: Users with contribute permissions only can still configure the repeating rows app
5374	Improved: Better inform users about auto-delete of all orphan items in the Details list
5381	Fixed: Rich text fields do not render in Firefox
Version 1.0.12, Sep-22-2016	
5038	Fixed: Repeating rows app cannot handle date picker if the format is from other regions
5051	Fixed: Repeating rows app date fields become inaccurate if the region is different
5052	Improved: Properly render enhanced rich text fields in repeating rows fields.
Version 1.0.08, Mar-17-2016	
5200A	Added: Support SP2013 on-premises.
Version 1.0.07, Feb-07-2016	
4796	Improved: Enable including lookup fields with up to 2000 items (instead of only 100).
Version 1.0.06, Dec-23-2015	
4781	Improved: Saving changes message displays endlessly when trying to save RR configurations. This started happening due to O365 API issues (\$.getJSON stopped working). We have switched to another AJAX method and it solved the issue.
Version 1.0.05, Dec-11-2015	
4774	Fixed: Having a choice field as the first field in a RR column causes it to not show values in the view form
4755	Fixed: Repeating Rows app does not follow regional settings when values are typed
4775	Fixed: Lookup columns only show choice ID in RR columns
Version 1.0.01, Sep-03-2015 - Base version
